PROFESSIONAL SUMMARY

Full-stack developer with 4+ year experience and strong expertise in Laravel, REST APIs, React, and Inertia.js, specializing in ERP, CRM, inventory, and fintech systems. Experienced in designing role-based access control (RBAC), payment gateway integrations, commission workflows, and API-driven architectures. Proven ability to deliver scalable, production-ready applications for business operations and financial services.

TECHNICAL SKILLS

Backend: PHP 8+, Laravel 9/10, REST APIs, Authentication, RBAC

Frontend: React.js, Inertia.js, Blade, HTML5, CSS3, Bootstrap 5, JavaScript, TypeScript

Database: MySQL

Architecture & Patterns: MVC, Service / Action pattern, Traits, Enums, API Resources

Integrations: Payment Gateways, AEPS, DMT, PAN APIs, SMS & WhatsApp APIs

Tools & Practices: Git, Git Action, CI/CD, PHPUnit, PSR-12, Yajra Datatables,

WORK EXPERIENCE

DiGiTechVers (Full-Stack Developer)- **Dec 2025 – Present**

- Developed and maintained Laravel-based web applications and business portals.
- Built and optimized REST APIs, database queries, and backend workflows.
- Implemented role-based access control (RBAC) and secure authentication.
- Integrated third-party APIs and optimized application performance.
- Designed SEO-friendly website structures, metadata, and clean URLs.
- Collaborated on digital marketing implementations, including landing pages, lead forms, and performance optimization.
- Improved website visibility through on-page SEO best practices and performance tuning.

NicePe Soft (**Backend / Full-Stack Developer)** – **Aug 2024 – Nov 2025**

- Played a key role in building a fintech platform (NICEPE Portal) supporting AEPS, DMT, PAN, and document services.
- Designed multi-level user hierarchy (Admin to Retailer & API Clients).
- Implemented automated commission distribution logic.
- Integrated multiple external fintech APIs with checksum and signature validation.
- Improved transaction reliability using pipeline-based processing and custom exception handling.

Self-Employed / Freelance Full-Stack Developer - **Sep 2021 – Jul 2024**

- Delivered complete web applications, ERP, CRM, and inventory systems using Laravel.
- Developed responsive, business-focused websites with admin dashboards.
- Implemented on-page SEO, technical SEO fundamentals, and content structure optimization.
- Executed digital marketing support including landing pages, inquiry forms, and campaign tracking.
- Integrated payment gateways, SMS, WhatsApp, and third-party APIs.
- Built REST APIs for mobile apps and external system integration.
- Managed full project lifecycle: requirement analysis, development, deployment, SEO, and post-launch support.
- Worked directly with clients to improve online presence, lead generation, and operational efficiency.

KEY PROJECT

NICEPE Fintech Portal - **Laravel | PHP 8.1+ | MySQL | Yajra Datatables**

- Developed a fintech platform providing AEPS, DMT, PAN, and document services.
- Implemented 5-level RBAC hierarchy (Admin → Super Distributor → Distributor → Retailer → API Client).
- Built automated commission distribution with balance and transaction validation.
- Integrated external APIs (P4Point, NSDL, Eko, UTI) using adapter pattern.
- Designed pipeline-based transaction processing with custom exception handling.
  Applied clean architecture using Actions, Services, Traits, Enums, and reusable API responses.

MilkMIlch Web & Mobile Application – **Laravel 10 | React Native | REST APIs**

- Built a complete milk purchase and sales management system.
- Managed users, suppliers, inventory, billing, and reporting.
- Developed REST APIs for mobile app integration.
- Automated daily and monthly bill generation.
  Delivered mobile-friendly experience for field operations.

M-Easy Pro – Inventory & Production Management System - **Laravel | Inertia.js | React.js**

- Developed inventory and production planning software.
- Managed raw materials, finished goods, suppliers, and customers.
- Implemented production recipes and scheduling.
- Generated sales, purchase, stock, and production reports.
- Integrated SMS and WhatsApp notifications for billing and communication.

SRKE Reward – MS/CRM System - **Laravel | Blade | JavaScript**

- Built CRM system with user, customer, and sales management.
- Implemented reward setup, tracking, and redemption logic.
- Integrated SMS gateway for promotions and alerts.
- Generated analytical sales and customer reports.

Bharat Press – Business Directory & Online Ordering System - **PHP | Laravel | HTML | CSS | JavaScript | Bootstrap | MySQL**

- Developed a business directory platform with online product ordering.
- Implemented category-based listings and search functionality.
- Built admin panel for managing businesses, products, and orders.
- Optimized website for SEO to improve organic traffic and visibility.

EDUCATION

Diploma in Computer Science **– National Institute of Electronic and Information Technology | Year: 2022**
Bachelor's Degree in Art **– Deen Dayal Updhaya Gorakhpur University | Year: 2021**
